ENVIROCARE
we care

INTRODUCTION

We are surrounded by dust, germs and microbes. Its all around us, We know that dust has a bad effect on our health,while some of the microbes are harmful and some of them are mandatory for our life. Envirocare was established to keep your surroundings clean and healthy.

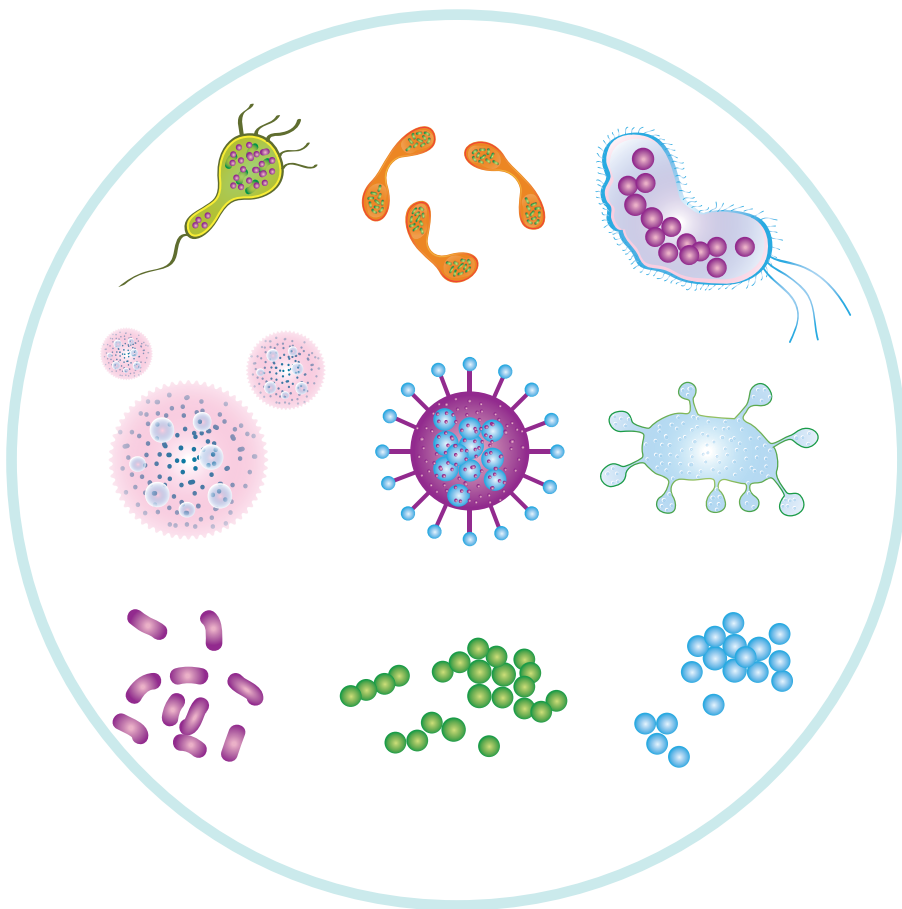

OUR VISION

- * Envirocare wants to be the first & the best choice when it comes to effective disinfecting using a safe method .
- * Providing a healthier and safer environment where ever it is needed.
- * Improving the life style of the human being .
- * Increases over all productivity.

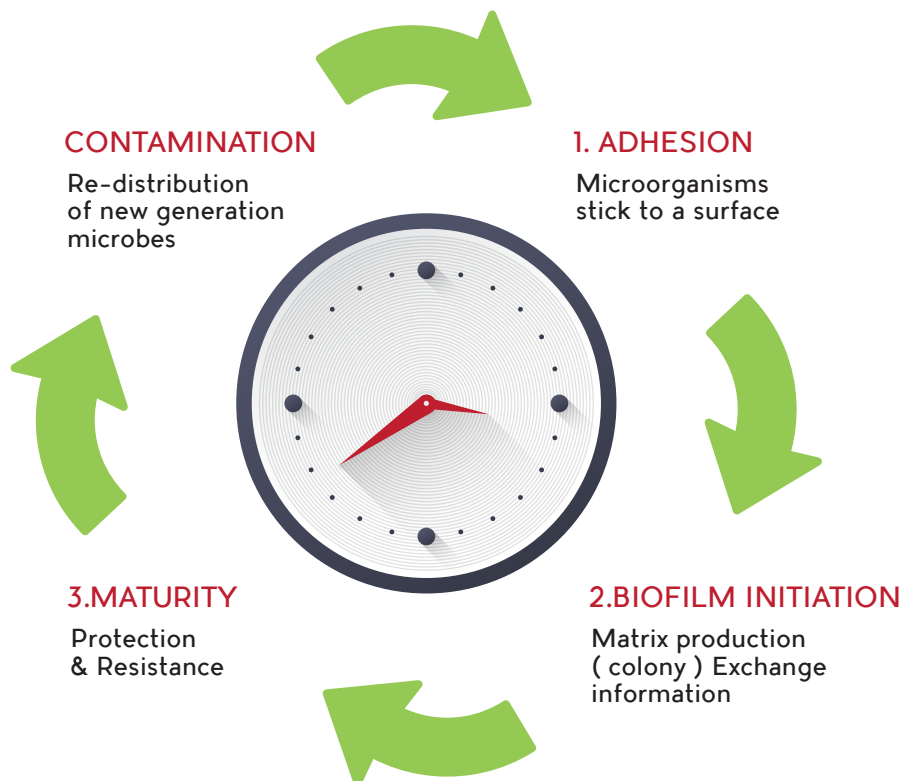

FACTS

- * World Health Organization announced that 34000 human beings loose their lives every single day due to infection.
- * Air borne infection is responsible for illness caused by many types of microbes.
- * Air borne infections are widespread, sometimes fatal and usually cause damages. The control of such infections simply means the control of Biofilm.
- * These organisms are carried on the particles suspended in air. These particles are positively charged. Increasing evidences show that this positive load is harmful. Many asthmatics for example benefit much if this positive load is maintained low.

WHAT IS BIOFILM ?

- * Definition : Any site where attachment and multiplication of microbes take place on any surface anywhere.
- * Biofilms provide air with non-stop flow of strong and numerous microbes that may be too dangerous to children, elderly, diabetics, hypertensive people, pregnant ladies, cancer patients and many others.
- * Biofilms are totally un-reachable such as AC ducts either in cars or buildings responsible for diseases, sometimes mild as frequent upper respiratory tract infections but occasionally fatal as Legionnaire disease and constantly responsible for bad odors.

DUCTING

WHY & HOW ?

- * Improve the indoor air quality
- * Save energy cost
- * Decrease the risk of having bacteria growth in the ducts
- * Decrease the Fire risk that may be transported by the Dirt
- * Ensure the functionality of the ventilation system

CLEANING STEP BY STEP

- * View of the system
- * What kind of access to the duct system?
- * When can the cleaning take place.
- * Inspecting the system
- * Plan for the cleaning by marking special points.
- * Inform the building of the cleaning procedure.
- * What kind of assets are in the building for protection purposes?

EQUIPMENT NEEDED FOR THE DUCTING SERVICES

- * Inspection doors
- * Metallic scissors for cutting the hole in the duct system
- * Duct tape
- * Dust mask
- * Working light
- * Flashlight
- * Screws
- * Rivets
- * Goggles
- * Safety clothes
- * Safety shoes
- * Ladder / Scaffold
- * Gloves
- * Compressor
- * Small tools screwdriver hammer and such
- * Small vacuum with hepafilter
- * Cleaning equipment soap, bucket and cloth

Picture is being taken for documentation of the need for cleaning

Inspection after the cleaning

KLORKLEEN

WHAT IS KLORKLEEN?

KlorKleen is a tablet that combines a detergent and disinfectant making it a multipurpose cleaning and disinfectant tablet. Those tablets are made to kill germs fast and washes thoroughly.

WHAT IS KLORKLEEN USED FOR?

- ✱ High, intermediate, and low level environmental surface disinfection.
- ✱ Washing and cleaning surfaces.
- ✱ Broad spectrum activity against micro-organisms including.
 - Bacteria
 - Mycobacteria
